DETAILED ACTION

Papers Received

Receipt is acknowledged of the applicant's response and petition for extension of time, both received on 24 May 2004.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The rejection of Claims 10-25 under 35 U.S.C. 103(a) as being unpatentable over Kardys in view of Tipton *et al.* is maintained.

Response to Arguments

Applicant's arguments filed 24 May 2004 have been fully considered but they are not persuasive.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so

long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

Furthermore, it would seem that the applicant is re-treading the same argument from earlier in the prosecution of this instant application. As previously addressed in the final rejection of 14 April 2003, with regard to the applicant's arguments against the motivation to combine the references of the prior art, it would seem unlikely that an applicant seeking a patent would disclose a novel or innovative feature of a claimed invention while simultaneously disclosing a fault with that same invention. The applicant's arguments appear to place the burden of finding a motivation to combine the prior art references solely onto the disclosure of the Kardys patent. However, in making a rejection under 35 U.S.C. 103(a), the collective disclosure of the prior art must be considered. In a sense, the applicant is correct in that the prior art must show a reason for combining the references together. However, the prior art is relied upon for all that it teaches, whether such a disclosure is explicit, implicit, or inherent. See MPEP § 2112. As such, in the view of the examiner, the disclosure of the Tipton *et al.* patent points to an ever-present goal in the art of controlling the viscosity of emulsions and dispersions, particularly those that provide a medicinal or nutritional benefit for a subject. Furthermore, the Tipton *et al.* patent shows a way of controlling the viscosity of such compositions through the use of solvents such as ethyl lactate. Thus, when the prior art is collectively considered, one of ordinary skill finds the motivation to combine the disclosures of the prior art with a reasonable expectation of success. All pending claims remain rejected.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
